Piyush singh

Frontend Developer(React)

PROFESSIONAL SUMMARY

Proactive Frontend Developer skilled in React.js, HTML, CSS, and JavaScript with a keen understanding of responsive design and user experience. Adept at using Generative AI and rapidly learning new technologies. Strong collaboration and problem-solving skills ensure high-quality, scalable web applications.

WORK EXPERIENCE

PT communication pvt. ltd

Assistant Engineer
November 2022-present

Job responsibilities:

- Planned, executed, and controlled projects resulting in a 20% increase in project completion efficiency.
- Managed sub-contracts and coordinated with vendors, leading to a 15% reduction in project delays.

PROJECTS

1. BiggBasket | 🌐 | 📱

HTML5 | CSS3 | JavaScript

- Developed a clone of BigBasket with comprehensive product listing and filtering features, mirroring the original website's core functionalities.
- Implemented responsive designs using HTML, CSS, and vanilla JavaScript to ensure a visually appealing interface.
- Optimized the web application for desktop usage, addressing performance and scalability concerns.

2. NETFLIX CLONE | 🌐 | 📱

HTML5 | CSS3 | Responsive Web Design | Git

- Designed and implemented a Netflix-like user interface focused on visual appeal using HTML5 and CSS3.
- Ensured responsive design for optimal viewing experience across various devices and screen sizes.
- Utilized Git for version control to manage and track project changes effectively.
- Proactively planned functionality integration to enhance the application's dynamic capabilities.
